United Alloy, Inc Will Add a Third Location in Quincy, Illinois

United Alloy, Inc has announced that they are increasing their footprint with a 24,000 sq. ft. facility located in Quincy, IL. The Quincy location will help United Alloy continue to expand capacity and meet the needs of their growing customer base.

Headquartered in Janesville, Wisconsin, with a second facility in Seguin, Texas, United Alloy, Inc. is a contract metal fabrication and powder coating company. United Alloy produces the highest quality leak-proof metal fuel tanks, hydraulic reservoirs, skids, frames, chassis, trailers, and complex weldments for an extensive list of long-term Fortune 500 OEM customers. United Alloy is ISO 9001 Certified and is also recognized as a Woman/Minority Owned Business.

United Alloy chose Quincy because of the great workforce located within the tri-state region of Western Illinois, Northeast Missouri, and Southeast Iowa. United Alloy partnered with the Great River Economic Development Foundation to select the right location. This location will not only suit United Alloy's current needs but also help United Alloy become part of the Quincy Community.

To start, the Quincy location will remain small and be a weld only facility for a few years. Once United Alloy gains footing in the area, the plan will be to construct a larger facility. The goal is to begin welding their first product by the beginning of April 2023.

With an April start date set, United Alloy will be holding a three-day on-site job fair that will take place on February 21st, from 1 to 6 p.m., February 22nd, from 10 a.m. to 6 p.m. and February 23rd, from 8 a.m. to 12 p.m. More information about the upcoming job fair will be posted on United Alloy's Facebook and LinkedIn pages. To learn more about United Alloy and their employment opportunities, please visit their website – www.unitedalloy.com or contact them at 608-758-4717.
